

Dr. David McBride, Ph.D.

David McBride is a Research Analyst for the Missouri Department of Health and Senior Services, Office of Epidemiology, and serves as Data Manager for the Show Me Healthy Women and WISEWOMAN programs. He also works with the Missouri Cancer Registry and DHSS Comprehensive Cancer Control Program. His current projects involve program evaluation, database development and cancer epidemiology.

Dr. McBride earned his doctorate in biological anthropology from the University of Missouri – Columbia, specializing in biostatistics and forensic anthropology. He is a member of the Columbia College adjunct faculty and has been with DHSS for a little over three years.

In addition to recent contributions of statistical analyses and graphics to the WISEWOMAN Program Outcomes and Missouri Cancer Burden reports, Dr. McBride has authored or co-authored papers on topics as diverse as the social epidemiology of diabetes among the Salt River Pima-Maricopa Indian Community and the archaeology of Mississippian burial mounds in Cahokia, near East St. Louis. He is an abstract reviewer for the 2011 North American Congress of Epidemiology, and a member of the American Statistical Association, the American Anthropological Association and Sigma Xi. In his spare time he is an amateur musician (tuba and electric bass), and enjoys traveling with his wife, two sons, (soon-to-be) daughter, and two canine children.
